

A valuable pair – extruder and injection molding system

Save
up to
\$41,000

Purchase an extruder for \$200,000 USD or more and get a piston injection molding system and one standard mold for free*

Your busy formulation development process needs a smart workflow – one that allows going directly from compounding to material characterization. The Thermo Scientific™ Process 11 Extruder is the ideal compounder for material development, especially when working with small sample volumes.

Now you can add the Thermo Scientific™ HAAKE™ MiniJet Pro Injection Molding System to produce sample specimens and really speed up your workflow.

What can the HAAKE MiniJet System do for me?

- **Save material** – Create specimens with just 2 to 5 ml of material
- **Mold flexibility** – Get ISO and ASTM compliant molds, plus custom shape design
- **Material flexibility** – Use powders, pellets or the melt directly from an extruder
- **Easy handling** – Store parameters for quick and reliable specimen production
